

## GR CUP TIRE ORDERING, BILLING PROCEDURES, & SERVICE POLICIES

To all participants,

Continental Race Tire is proud to be the official tire supplier for the GR Cup series in 2026! Below are a few updates with respect to tire ordering, service policies, and billing procedures that have been structured to make the procurement of tires at race events a seamless exchange.

### Tire Ordering & Billing Procedures

- Teams are required to pre-order their race tires on [www.continentalracetire.com](http://www.continentalracetire.com) no later than **two weeks** prior to a GR Cup event. Availability of tires will not be guaranteed if orders are received after this deadline.
- Each registered entrant must purchase a minimum of 2 sets of slicks to be used during official GR Cup competition sessions. Teams can purchase a maximum of 3 sets of slicks, per car, for official competition sessions.
- **Official competition sessions** are defined as Qualifying 1, Race 1, Qualifying 2, & Race 2.
- Additional “practice” tires will need reserved when pre-ordering tires for a race event if a team wishes to use new tires for pre-event test sessions.
- Continental will bring two sets of rain tires for each registered car at GR Cup events. These will be on reserve for teams to purchase in the event of inclement weather.
- Continental Trackside Service will accept credit cards only for transactions engaged at events.
- For these transactions, customers will need to provide their credit card info and a mobile number to enable text communication with the Continental Event Manager throughout the weekend.
- Electronic invoices are automatically generated and sent to the email address provided.
- Final billing receipts will be emailed from our billing service, Authorize.net.

### Tire Service Policies

When a team presents mounted units to a Continental Tire track service member, you'll be asked if the dismounted tires are to be **scrapped (X)** or **saved (S)**.

- Wheels must be stripped of wheel weights and cleaned prior to dropping off for tire installation.
- There is a \$5.00 per tire disposal fee for **scrapped** units.
- **Saved** tires will be set aside in a designated area with your car number written on the tread and must be picked up before the last day of the event.

### Tire Scanning

- Continental GR Cup Racing Slicks are equipped with RFID chips for tracking purposes.
- Teams must specify to Continental's Trackside Service Event Manager which tires they are declaring for "Official Competition Sessions," which include Qualifying and Race sessions.
- These declared sets will have their RFID chips scanned, assigned to the team's car number, and stored in database for that race event.
- The event database is shared with SRO Tech officials for post-race inspection to ensure teams are racing on tires purchased and assigned at that event.

This process is intended to simplify and enhance the trackside service experience. Any trackside billing or service inquiries can be directed to the Event Manager, Joe Smiecinski. The Continental Race Tire team looks forward to another successful season working with GR Cup teams in 2026.
